

# Suzanne Slonim, MD

*Interventional Radiologist*

## ABOUT

Dr. Slonim is a board-certified Interventional Radiologist, specializing in minimally-invasive image guided surgeries. She received her education and training from several prestigious universities, including George Washington University School of Medicine, UCLA, and Stanford University.

Dr. Slonim's focus is Uterine Fibroid Embolization (UFE), a minimally-invasive procedure that blocks blood supply to the fibroids and avoids the removal of the uterus. She's trained numerous doctors in her technique and has remained on D Magazine's Best Doctor list for multiple years in a row.

By performing UFE in an outpatient setting, Dr. Slonim is fulfilling her passion for helping women live fibroid free without major surgery.
