

Suzanne Slonim, M.D.

INTERVENTIONAL RADIOLOGIST

The concierge service, kindness and expertise motivates women with fibroids to share their positive experience after visiting the Fibroid Institute Dallas. Dr. Suzanne Slonim, founder and Medical Director of the Fibroid Institute Dallas, is focused on providing concierge medical care to women seeking non-surgical treatment of uterine fibroids. Uterine Fibroid Embolization (UFE), is a non-surgical procedure used to eliminate the fibroids and ultimately improve quality of life. "UFE should be more accessible to patients given that it's less expensive and a less invasive treatment that resolves all symptoms with a 90 percent success rate and a one-week recovery time," Dr. Slonim says.

The Fibroid Institute Dallas is the only practice in the region that focuses exclusively on treating fibroids without surgery. In her 25-year practice, Dr. Slonim has performed more than 30,000 procedures, and is widely regarded as a leading expert in UFE. She authored the 2018 book, *Pain-Free Periods — Banish Menstrual Misery, Fight Fibroids, and Get Your Life Back*. She shares, "I treat every patient as if she were my sister. I feel honored that women are willing to share their concerns with me." Dr. Slonim is grateful to her colleagues, peers and patients for her most recent awards: D Magazine BEST Doctors 2020, Dallas Business Journal Women In Business Honoree 2020, and Texas Super Doctors 2020.
