Dr. Reddy is a board-certified diagnostic and interventional radiologist who uses the latest technology and techniques to improve and eliminate fibroid symptoms—without the need for surgery. By educating women about non-surgical fibroid treatment and providing superlative medical care, Dr. Reddy helps her patients become fibroid free.

Before joining Fibroid Institute Dallas, Dr. Reddy focused on interventional oncology, while also developing a strong interest and skill set in utilizing interventional radiology techniques to shrink fibroids.

From a family of many physicians, it was natural for Dr. Uma Reddy to pursue medicine. She attended Kurnool Medical College, Kurnool, Andhra Pradesh, India. She completed her residency in diagnostic radiology and fellowship in vascular and interventional radiology at the University of Miami. After training, she opened and developed their satellite outpatient interventional radiology center in Plantation, Florida.

Dr. Reddy is passionate about educating women on fibroid treatment options and providing the highest standard of patient care. Patients are welcome to contact her anytime with questions and concerns. She is committed to helping her patients through the entire fibroid treatment process with UFE, from consultation to follow up visits.

In her spare time, Dr. Reddy enjoys taking dance classes and spending time with family and friends. She is fluent in three languages: English, Hindi, and Telugu.
